

MOSSHEALTHSKILLS

Course: BCG Scar Sighting

Reference Number: 2500

This programme has been specifically designed for those working in Health care recruitment, travel and migrant health to be able to assess, judge and determine the validity of BCG scars, including a validated 'Scar sighting activity'.

Content:

- Professional roles
- Tuberculosis in Britain, epidemiology and aetiology
- BCG immunisation programmes and the development of immunity
- Current issues of significance in relation to BCG
- BCG scars
- 'Sighting' BCG scars assessment

Training programmes are highly interactive, practically focussed using case scenarios and common professional dilemmas and take a blended learning approach.

Additional support and advice on operational frameworks can be provided
